3 KEY INFORMATION

The information set out in this section is not intended to be comprehensive and should be read in conjunction with the full text of this Prospectus.

3.1 Offer

The Company is making a pro-rata non-renounceable issue offering Shareholders registered as such at 5.00pm WST on Monday, 30 March 2015 (**Record Date**) 1 New Share for every 3.75 Shares held as at the Record Date, at an issue price of 4 cents per New Share.

The Closing Date and time for acceptances is 5.00pm Perth time on Monday 20 April 2015. Subject to compliance with the Listing Rules, the Company reserves the right to close the Offer early or to extend the Closing Date.

The Offer is fully underwritten by Ansheng Investment Company Limited (Ansheng), and the table set out in Section 5.4 shows the extent of the potential increase in Ansheng's voting power in the Company as a result of taking up any shortfall under the Offer pursuant to its underwriting obligation.

Details of the Offer are set out in full in section 5.

3.2 What you need to do

The number of New Shares to which you are entitled is shown on the accompanying Entitlement and Acceptance Form. Fractional Entitlements will be rounded up to the nearest whole Share. You may do one of the following:

- accept your Entitlement **in full**;
- accept **part** of your Entitlement;
- allow your Entitlement to **lapse**; or
- accept your Entitlement **in full** and apply for additional New Shares in excess of your Entitlement.

See section 7 for detailed instructions on what you need to do.

3.3 Purposes of the Offer

Following completion of the Offer (which is fully underwritten) the Company will issue approximately 100,011,842 New Shares, raising approximately \$4 million (before the costs of the Offer).

The purposes of the Offer are to:

- allow the Company to complete further work necessary for a mining licence application in the first half of this year at the Company's Letlhakane Uranium Project in Botswana;
- enable Shareholders to participate further in the ownership and growth potential of the Company;
- repay the short term loan from Ansheng Investment Company Limited (see section 8.1); and
- provide additional working capital.

The proposed use of the Offer proceeds is discussed more fully in section 6.

The Directors consider that the Offer represents the best means of capital raising given the current market for accessing capital for exploration and development, which has significantly deteriorated in recent times.

3.4 Effect of the Offer on the share capital of the Company

Following completion of the Offer (which is fully underwritten) and the issue of New Shares there will be 475,056,253 Shares and 12,210,000 Options on issue.

A more detailed description of the effects of the Offer, including the effects of the Offer on the Company's capital structure, is contained in section 8.

4 RISK FACTORS

Investing in the Company involves a degree of risk. This section describes the potential risks that may be significant for you to consider in relation to an investment in the Company.

Before applying for New Shares, you should consider whether they are a suitable investment for you and the risks associated with an investment in New Shares. Many of the risks are outside the control of the Company and its Directors. These risks include those identified in this section and other matters referred to in this Prospectus. Additional risks and uncertainties that the Company is unaware of or the Company currently believes immaterial, may also become important factors that affect the Company. The occurrence of any of the events which pose these risks could have a

material adverse effect on the Company's prospects, financial condition and results of operations. In that case, the trading price of Shares could decline and you could lose some or all of your investment

4.1 Specific risk factors

In addition to the general risks applicable to any investment in a listed resources company, the Directors believe that there are a number of specific factors that should be taken into account before investors decide whether or not to invest in the Company. These are set out below.

(a) Uranium prices

The Company's business is greatly influenced by the market price for uranium which is driven by supply and demand factors which are outside of the control of the Company. A fall in the market price of uranium could substantially impact on the economics of the Company's projects and on exploration and development programs, and consequently on the Company's share price.

(b) Project development timetable

The Company's primary business is currently focused on developing its Letlhakane Uranium Project in Botswana. As this project is at feasibility stage, there are significant milestones that must be achieved before the project can be developed.

(c) Capital requirements and costs

The Company has finite working capital and will therefore need to raise additional capital, through either equity or debt or joint venture financing or sale, to support its projects. The Company cannot guarantee that such funding will be available as it is required.

(d) Resource estimates

Resource estimates are expressions of judgment based on knowledge, experience and resource modelling. Resource estimates are inherently reliant on interpretations and are therefore imprecise. Estimates may be valid when originally calculated and then later be altered as new information or techniques become available. Although the Company employs qualified professionals to prepare resource estimates, as further information becomes available these estimates may change. Any changes to resource estimates could negatively affect the Company's projects.

(e) Regulatory risks

The Company's exploration and development activities are subject to various laws governing prospecting, development, permit and license requirements, industrial relations, environment, land use, royalties, water, toxic substances, mine safety and occupational health.

Approvals, licenses and permits required to comply with such rules are subject to the discretion of the applicable government officials. No assurance can be given that the Company will be successful in obtaining any of these various approvals, licenses and permits or maintaining such authorisations in full force and effect without modification or revocation.

Where these approvals, licenses and permits are required and not obtained, the Company may be restricted or prohibited from continuing with its exploration projects.

(f) Personnel and access to labour

The Company is reliant on key personnel employed or engaged by the Company. Loss of such personnel may have an adverse effect on the performance of the Company. Further, the recruitment of additional personnel with appropriate qualifications is critical to the Company's success. As the Company's business grows it will require additional financial, administrative, mining and operations staff. While the Company believes it will be successful in attracting and retaining qualified personnel, there can be no assurance of such success.

4.2 Minerals industry risk factors

(a) Operational risks

Exploration, development, mining and processing are labour and machinery-intensive processes. Notwithstanding that the Company intends to maintain its machinery regularly, unforeseen major failures, breakdowns or repairs required to key items of mining plant and equipment or mine infrastructure may result in significant delay or cost to the Company. In addition, poor weather conditions over a prolonged period may adversely affect mining and exploration activities and hence the timing of receipt of operating revenue.

A rise in operating costs (for materials or labour) may adversely affect the Company and could render some opportunities or projects uneconomic.

(b) Exploration and Mining licenses

The Company's activities depend on the grant or maintenance of appropriate licenses, concessions, leases, permits and regulatory consents which may be withdrawn or made subject to limitations. Although the Company believes that the licenses, concessions, leases, permits or consents it requires will be granted and that those it holds will be renewed (if required, once they expire, according to the current laws), there can be no assurance that they will be granted or renewed (as the case may be) or as to the term of any such grant or renewal.

(c) Environmental risks

The Company's current and proposed projects and operations are subject to environmental laws and regulations under the law of Botswana. The Company expects that, due to the nature of its mineral exploration operations, its activities will have an impact on the environment.

The Company strives to carry out its activities in a responsible manner and in compliance with all applicable laws and regulations. Environmental laws and regulations are likely to evolve in a manner that will require exceedingly stricter and more disciplined standards. Also, as these laws and regulations develop those standards will likely carry greater penalties for non-compliance. Therefore the cost and requirements for complying with these standards may grow in the future and this may have a negative effect on the Company and may potentially prevent the Company from being able to develop an otherwise economically viable project.

While the Company seeks to minimise its impact on the environment, events either within or outside of the Company's control may occur which result in accidental and unforeseen spills, leakages or other consequences, which could damage the environment and expose the Company to extensive liability against which it has not (or may not be able to) insure.

4.3 General risk factors

(a) Liquidity risk

There may be relatively few buyers or sellers of securities on ASX at any given time. This may affect the volatility of the market price of the Company's Shares and the prevailing market price at which Shareholders are able to sell their Shares. This may result in Shareholders receiving a price that is less or more than the price paid under the Offer.

(b) Foreign exchange risk

International prices of various commodities are commonly denominated in United States Dollars, whereas the income of and expenditure of the Company is accounted for in Australian dollars and United States dollars, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.

4.4 Speculative nature of investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the performance of Company and the value of the New Shares offered under this Prospectus.

Therefore, the New Shares to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Shares.

Shareholders and other potential investors should regard an investment in the Company as speculative and should therefore consider carefully and consult their professional advisors to determine whether an investment in the Company is suitable for them.

5 DETAILS OF THE OFFER

5.1 The Offer

On Friday 27 February 2015 the Company announced that it will raise approximately \$4 million (before costs) by offering Shareholders the opportunity to subscribe for 1 New Share for every 3.75 Shares held on the Record Date at an offer price of 4 cents per New Share. Each New Share will be issued fully paid. From the date of issue, New Shares will rank equally in all respects with existing Shares.

The number of New Shares to which you are entitled is shown on the accompanying Entitlement and Acceptance Form. Fractional entitlements have been rounded up to the nearest whole Share.

The Closing Date and time for acceptances is 5.00pm Perth time on Monday, 20 April 2015.

5.2 Who is entitled to participate in the Offer

Every Shareholder registered as the holder of fully paid ordinary shares in the Company at 5.00pm Perth time on Monday, 30 March 2015, and whose registered address is in Australia, New Zealand or China (including Hong Kong), is entitled to participate in the Offer. These Shareholders are referred to in this Prospectus as “**Eligible Shareholders**”

5.3 No rights trading

The Offer is non-renounceable and therefore there will be no rights which are tradeable on ASX or otherwise transferable. Shareholders will therefore not receive any payment or value in respect of Entitlements not taken up.

5.4 Underwriting

The Offer is fully underwritten by Ansheng Investment Company Ltd (**Ansheng**) on the terms of the Underwriting Agreement. This means that Ansheng will take up any Entitlements or Additional Shares which are not accepted or subscribed for by Shareholders. The material terms of the Underwriting Agreement are set out in section 10.4.

As at the date of this Prospectus, Ansheng has a voting power in the Company of approximately 31.98%.

The table below demonstrates the approximate extent of the potential increase in the voting power of Ansheng as a result of underwriting the Offer (assuming no existing Options are exercised prior to the Record Date):

Event/Date	Number of Shares in which Ansheng has a relevant interest	Voting Power of Ansheng (%)
Date of Prospectus	119,952,105	31.98
After issue of New Shares and assuming 100% Shortfall.	219,963,947	46.30
After issue of New Shares and assuming 75% Shortfall.	202,957,793	42.72
After issue of New Shares and assuming 50% Shortfall.	185,951,640	39.14
After issue of New Shares and assuming 25% Shortfall.	168,945,486	35.56
After issue of New Shares and assuming no Shortfall.	151,939,333	31.98

The figures depicted above demonstrate the potential effect on control of the Company as a result of the underwriting by Ansheng. The extent of this control will depend on the extent to which Eligible Shareholders take up their Entitlements under the Offer. To the extent that Shareholders take up their Entitlements and Additional Shares under the Offer, the underwriting obligation of Ansheng will reduce correspondingly.

Ansheng has advised the Company that, in general, it fully supports the Company's strategy to prepare the Letlhakane Uranium Project for early development and production to take full advantage of the expected recovery in the uranium price. Ansheng will continue to use its voting power in the interest of the Company and its shareholders.

Ansheng has consented in writing to the inclusion in this Prospectus of the statement set out above in the form and context in which it appears.

5.5 ASX quotation

The Company will make an application to ASX for admission of the New Shares to quotation on ASX within 7 days after the date of this Prospectus.

If the application referred to above is not made within the seven days, or the New Shares are not admitted to Official Quotation on ASX within 3 months after the date of this Prospectus (or such longer period as is permitted by the Corporations Act), none of the Shares offered by this Prospectus will be issued. In that circumstance, all applications will be dealt with in accordance with section 724 of the Corporations Act.

The fact that ASX may grant Official Quotation of the New Shares is not to be taken in any way as an indication of the merits of the Company or the New Shares.

5.6 Issue of New Shares

It is expected that New Shares will be issued and holding statements will be despatched to applicants by Monday, 27 April 2015.

Subscription moneys will be held in a subscription account until the New Shares are issued. This account will be established as a trust account and kept by the Company on behalf of Applicants.

Interest earned on the subscription moneys will be for the benefit of the Company and will be retained by the Company irrespective of whether and when New Shares are issued.

5.7 Minimum subscription

There is no minimum subscription to the Offer.

5.8 Participation in dividends

The New Shares that are the subject of this Prospectus will rank for dividends *pari passu* in all respects with existing Shares. It is not envisaged that dividends will be paid on those Shares in the foreseeable future.

5.9 Overseas Shareholders

This Offer is being made only to Eligible Shareholders.

In the Company's view it would be unreasonable to extend the Offer to Shareholders with registered addresses outside Australia, New Zealand and China (including Hong Kong) ('**Foreign Shareholders**') having regard to the number of Shareholders resident outside those jurisdictions, the number of New Shares that would be offered to them, and the cost of complying with the legal requirements in those jurisdictions in relation to the Offer.

Accordingly, the Offer is not being made to Foreign Shareholders or in any place where, or to any person to whom, it would otherwise be unlawful to make such an offer. It is the responsibility of Shareholders to ensure compliance with all laws of any country which may be relevant to the Offer.

5.10 Applications for Additional Shares

In addition to being able to apply for New Shares, Shareholders who subscribe for their full Entitlement will also have the opportunity to apply for New Shares that are not subscribed for under the Offer (**Additional Shares**), subject to the requirements set out in section 7.4.

The offer of Additional Shares (**Shortfall Offer**) is a separate offer pursuant to this Prospectus. The issue price of any New Shares offered pursuant to the Shortfall Offer shall be 4 cents per Share, being the price at which the Entitlements have been offered to Shareholders pursuant to this Prospectus. As permitted by the ASX Listing Rules, the Directors reserve the right to issue Shares comprised in the Shortfall at their discretion. Accordingly, the Company does not guarantee that you will receive any Additional Shares you may apply for in excess of your Entitlement. Related parties of the Company (including Directors), other than Ansheng in its capacity as Underwriter, may not apply for Additional Shares.

8.4 Effect on control of the Company

If all Eligible Shareholders take up their Entitlements in full, then the Offer will have no effect on control of the Company.

If some Shareholders do not take up their full Entitlements, then the shareholding interests in the Company of those Shareholders will be diluted. If no Eligible Shareholder other than Ansheng participates in the Offer and the Offer is fully subscribed (pursuant to the Underwriting Agreement), existing Shareholders' interests in the Company will be diluted by approximately 14.32% (as compared to their holdings and number of Shares on issue as at the date of this Prospectus).

The proportional interests of Foreign Shareholders will be diluted because those Shareholders are not entitled to participate in the Offer.

9 ENTITLEMENTS AND LIABILITIES ATTACHING TO THE NEW SHARES

9.1 New Shares

The following is a summary to the rights and liabilities attaching to the Shares. Full details of the rights attaching to the Shares are set out in the Company's Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

The rights and liabilities attaching to Shares can be summarised as follows:

Share Capital

The share capital of the Company presently consists of ordinary shares only. All existing Shares are of the same class and rank equally in all respects.

Voting Rights

Subject to any right or restrictions for the time being attached to any class or classes of shares (at present there are none), at a general meeting every holder of Shares present in person or by proxy, attorney or corporate representative has one vote on a show of hands and one vote per Share on a poll. A person who holds a Share which is not fully paid is entitled to a fraction of a vote equal to

the amount paid up (but not credited as paid up) on the Share divided by the total amount paid and payable on the Share (excluding amounts credited).

Dividend rights

Subject to the rights of holders of Shares issued with any special or preferential rights (at present there are none), holders of fully paid Shares on which any dividend is declared or paid are entitled to participate in that dividend equally. Each Share which is not fully paid is entitled to a fraction of the dividend declared or paid on a fully paid Share equivalent to the proportion which the amount paid up (but not credited as paid up) on the Share bears to the total amounts paid and payable, whether or not called, (excluding amounts credited) on the Share.

Rights on winding-up

Subject to the rights of holders of Shares issued upon special terms and conditions (at present there are none), holders of Shares will share in any surplus assets on a winding-up of the Company in proportion to the numbers of Shares held by them respectively.

Transfer of shares

Subject to the Constitution, the Corporations Act, the Listing Rules and any other applicable laws of Australia, and subject to any restrictions applicable to Shares that have been designated by the ASX as 'restricted securities', Shares are freely transferable.

Future Increases in capital

The allotment and issue of any New Shares is under the control of the Directors. Subject to the Constitution, the Corporations Act, and the Listing Rules, the Directors may allot or otherwise dispose of new Shares on such terms and conditions as they may in their absolute discretion determine.

Variation of rights

The rights attaching to the Shares may be varied in accordance with the Corporations Act.
